

## **EXHIBIT 6**

### **RIGHT-OF-WAY LAND VALUE**

#### **BY ROAD SEGMENT**

Include in Exhibit 6 a table that displays the right-of-way land value used for each road segment. The table needs to clearly display the right-of-way acres in total for each road segment and by each contributing party, along with the dollar value of the right-of-way in total and by contributing party. If there are any acquisition costs of any third party easements involved in the supplement, include those costs in the table as well.

If the body of the Fact Sheet does not discuss how the land values were determined, included a valuation statement with the table as well that documents how the land values used for the right-of-way value were derived.
